

Bighorn sheep – HD 380

Draft Changes for 2022-2023 Hunting Regulations:

Change the HD 380 bighorn sheep boundary to match the new HD 380 deer/elk boundary which removes the portion of land between U.S. Highway 287 and the Missouri River from HD 380.

Biological Implications:

No biological impacts expected as bighorn sheep are not known to occur in the area being proposed to be removed from the HD.

Social Implications:

The boundary change follows regulation simplicity directives to have similar boundaries between species where possible.
